

KNEKT RCU

SPECIFICATION

Wall-mounted Control Unit for use within a Linn Multi-zone System

KEY FEATURES INCLUDE

- Provides access to and control of Linn and Non-Linn sources within a KNEKT multi-zone audio system
- Two-way product feedback displayed on the unit
- Fully programmable to meet the individual user's requirements
- Remote control operation
- Software upgradeable to incorporate future developments
- UK and US style bezels
- Black and White finishes as standard

The KNEKT RCU is Linn's original multi-zone control unit, enabling direct access to and control of all sources in the KNEKT multi-zone audio system from anywhere, e.g. in homes, superyachts and commercial installations.

The unit is fully programmable and menu-driven to provide comprehensive multi-zone control. The 'Where, What, Do' button configuration is extremely simple to use. The 'Where' button allows the user to locate the sources they want to access (e.g. main system or local sources), 'What' enables the user to select a specific source to listen to (e.g. CD Player, Tuner, etc.) and 'Do' activates this source.

Two-way product communication is displayed on the RCU, making the unit exceptionally easy to use. The system can be operated directly from the control unit or via an infra-red handset.

The unit is designed primarily for in-wall use, but can be adapted to suit the installation. It is available to suit both UK and US style bezels and finished in black or white as standard, however, custom bezels are also available to order. A combined bezel which houses a KNEKT RCU and a LiteTouch or Lutron lighting control keypad provides a compact solution for combined audio and lighting control. The LT style bezel is available from LiteTouch and Lutron dealers.
